

TECHNICAL BULLETIN

Bastech 1900 Series

PRODUCT DESCRIPTION:

Bastech 1900 Series is a fatty alcohol water based defoamer designed for use in controlling foam in waste water treatment plants. This product has been designed to eliminate surface foam without depleting dissolved oxygen levels. Bastech 1900 Series has excellent spreading properties and is extremely cost effective.

APPLICATIONS:

Bastech 1900 Series is typically added neat just prior to the foaming areas which are typically clarifiers, aeration ponds, flumes, and outfalls. Although generally added neat it can also be pre-diluted with cold water.

TYPICAL PROPERTIES:

Appearance:	White emulsion
Density @ 80°F:	7.6 – 8.3 ppg
Viscosity @ 80°F:	<1800 cps
Solubility in water:	Dispersible

STORAGE AND HANDLING:

This product will freeze, please store above 40°F. If frozen the product should be warmed and mixed prior to use.

REGULATORY STATUS:

Bastech 1900 Series is manufactured in compliance with the regulations of the Food and Drug Administration as described in 21 CFR 176.210.

This product does not contain components that are regulated by California Proposition 65.

PACKAGING INFORMATION:

Bastech 1900 Series is available in bulk, tote bins at 2200 pounds net, and 55 drums with a net weight of 450 pounds.
